CHIMINEA

Safety Guide

We hope you enjoy a cosy evening relaxing around the Chiminea. Firewood and fire lighters have been provided. If you need more, these can be purchased from The Workshop on site.

Please **DO NOT** move the Chiminea. Take the lid off before lighting. This is essential for ventilating the fire. Always load the firewood into the belly of the Chiminea at the front, never from the top of the stove pipe. Don't place too much wood in at once. If the fire is too big, the Chiminea can explode. Avoid using the Chiminea if winds are very strong as sparks can lead to wildfires.

The Chiminea gets very hot so we have supplied tongs to move the firewood around. Never leave the Chiminea unattended. Use the sand provided to extinguish any flames before you leave the fire. And do take care if you have children or furry friends with you. If you need help lighting the Chiminea for the first time just give us a call.

Enjoy!
